Jiaming Li

Applied AI · Data · Business Operations

I combine data analysis, e-commerce operations and engineering to build tools teams use every day. I currently run Amazon operations across eight European marketplaces in restricted categories; before that, I co-developed a production telemetry platform and built a decision tool for a research team. Background in applied mathematics and computer science.

EXPERIENCE

E-commerce Operator Specialist

May 2026 — Present

Triple A internetshops GmbH · Shenzhen

- Manage Amazon operations across eight European marketplaces, each with approximately 2,000 SKUs.
- Work in restricted product categories where advertising is not allowed, so listing quality and compliance are the main levers.
- Analyse sales, traffic, fee, product and competitor data to identify optimisation opportunities.
- Keyword, competitor and product research with Seller Central, Helium 10, Keepa and Amalytix.

Data Platform Full-stack Engineer

Jan — Apr 2026

Sun Yat-sen University · Shenzhen

- Built a real-time monitoring platform covering ingestion, storage, analysis and reporting.
- Time-series pipelines with InfluxDB and MySQL for monitoring and anomaly detection.
- Interactive map and status dashboards for operational analysis.

Data Analyst & Research Assistant

May — Sep 2025

MaREI, University College Cork · Ireland

- MCDA models to score and rank five tyre-recovery alternatives for a 7+ person research team.
- Python pipelines for data cleaning, validation and sensitivity analysis.
- Turned the Excel-based process into an interactive web tool.

DEPLOYMENTS

Drone Monitoring ↗

A personal telemetry demo, plus a production monitoring platform I co-developed.

React · WebSocket · InfluxDB · Docker

MCDA Tool ↗

An interactive decision tool for exploring the trade-offs in end-of-life tyre recovery.

JavaScript · D3.js · Excel · Node.js

MoTai ↗

A local-first writing workspace that connects characters, world-building and AI-assisted chapters.

Electron · JavaScript · Local JSON · AI APIs

Connoisseur ↗

A sourcing workspace bringing requests, quotes and customer case histories together.

Next.js · TypeScript · Tailwind · Mock data

SKILLS

AI & ML	LLM APIs · Structured outputs · Transformers & embeddings · scikit-learn · Workflow automation
Engineering	Python · JavaScript/TypeScript · React · InfluxDB · WebSocket · Docker · Git
Data & BI	SQL · Python · Excel · Power BI · Tableau
E-commerce ops	Seller Central · Helium 10 · Keepa · Amalytix
Languages	English (IELTS 6.5), Chinese (native)

EDUCATION

MSc Computer Science (Interactive Media) — Sep 2024 – Mar 2026

University College Cork · Second Class Honours (2:1), top 10%

BSc Applied Mathematics (Data Computation) — Sep 2020 – Jun 2024

Taiyuan University of Science and Technology · Top 10% of cohort
