Shenzhen, China · Open to relocating worldwide (visa sponsorship required)

Data analyst with an applied-mathematics and computer-science background. I currently analyse Amazon marketplace performance across eight European markets, and have built decision-support tools, data pipelines and dashboards in research and university settings. Comfortable across SQL, Python, Excel and BI tools, from cleaning raw data to presenting a decision.

EXPERIENCE

E-commerce Operator Specialist · Triple A internetshops GmbH May 2026 – Present · Shenzhen

- Manage Amazon operations across eight European marketplaces, each with approximately 2,000 SKUs.
- Analyse sales, traffic, fee, product and competitor data to identify optimisation opportunities.
- Run keyword, competitor and product research with Seller Central, Helium 10, Keepa and Amalytix.

Data Platform Full-stack Engineer · Sun Yat-sen University Jan 2026 – Apr 2026 · Shenzhen

- Built a real-time data monitoring platform covering ingestion, storage, analysis and reporting.
- Developed time-series pipelines with InfluxDB and MySQL for monitoring and anomaly detection.
- Built interactive map and status dashboards for operational analysis.

Data Analyst & Research Assistant · MaREI, University College Cork May 2025 – Sep 2025 · Cork

- Developed MCDA models to score and rank five end-of-life tyre recovery alternatives for a 7+ person research team.
- Built Python pipelines for data cleaning, validation and sensitivity analysis.
- Turned the Excel-based process into an interactive web tool with adjustable weights and live rankings.

PROJECTS

MCDA Decision Tool · JavaScript, D3.js, Excel — Interactive multi-criteria analysis with real-time weighted ranking, TOPSIS, Pareto and sensitivity views.

UAV Monitoring Platforms · React, WebSocket, InfluxDB, Docker — Built a personal real-time telemetry demo and co-developed a separate production platform: ingestion, WebSocket streaming, time-series storage, flight analytics and dashboards.

Financial Quantitative Analysis Model · Python, scikit-learn — API-based workflow for market-data retrieval, technical indicators, strategy backtesting and Random Forest crossover estimation.

Connoisseur — Sourcing Workflow MVP · Next.js, TypeScript — Request-to-quote platform with customer cases, quotes, payment states and admin tools; mock-first architecture.

MoTai — AI Writing Workspace · Electron, LLM APIs — Local-first desktop app with context-aware AI generation, human review, backup and multi-format export.

EDUCATION

MSc Computer Science (Interactive Media) · University College Cork Sep 2024 – Mar 2026
Second Class Honours (2:1), top 10% · Web development, front-end development, VR development

BSc Applied Mathematics (Data Computation) · Taiyuan University of Science and Technology Sep 2020 – Jun 2024
Top 10% of cohort · Data analysis, machine learning, AI, algorithm design

SKILLS

Data & BI	SQL, MySQL, Python, Excel, Power BI, Tableau, data cleaning, KPI analysis
E-commerce	Amazon Seller Central, Helium 10, Keepa, Amalytix, competitor and marketplace analysis
Engineering	JavaScript/TypeScript, React, InfluxDB, REST APIs, Git, AI workflow automation
Languages	English (IELTS 6.5), Chinese (native)

李嘉铭 Jiaming Li

求职意向：数据分析师 · 商业 / 电商数据分析

arthur.jiaming.li@gmail.com
linkedin.com/in/arthurjiamingli · arthur-leoai.github.io
现居深圳 · 可前往全球工作（需工作签证担保）

应用数学本科、计算机科学硕士（爱尔兰科克大学）。现负责亚马逊欧洲 8 个站点的运营与数据分析，曾在科研与高校项目中搭建决策支持工具、数据管道和可视化看板。熟练使用 SQL、Python、Excel 及 BI 工具，能从原始数据清洗一路做到结论呈现。

工作经历

电商运营专员 · Triple A internetshops GmbH 2026.05 – 至今 · 深圳

- 负责亚马逊欧洲 8 个站点的日常运营，每个站点约 2,000 个 SKU。
- 分析销售、流量、费用、产品及竞品数据，发现优化机会。
- 使用 Seller Central、Helium 10、Keepa、Amalytix 开展关键词、竞品与选品分析。

数据平台全栈工程师 · 中山大学 2026.01 – 2026.04 · 深圳

- 搭建实时数据监控平台，覆盖数据接入、存储、分析与报表。
- 基于 InfluxDB 与 MySQL 开发时序数据管道，用于状态监控与异常检测。
- 开发交互式地图与状态看板，支持运营分析。

数据分析师 / 研究助理 · MaREI 研究中心，科克大学 2025.05 – 2025.09 · 爱尔兰科克

- 构建多准则决策（MCDA）模型，为 7 人以上的研究团队评分并排序 5 种废旧轮胎回收方案。
- 用 Python 搭建数据清洗、校验与敏感性分析流程。
- 将基于 Excel 的分析流程改造为可调权重、实时排序的交互式网页工具。

项目经历

MCDA 决策分析工具 · JavaScript, D3.js, Excel — 交互式多准则分析，支持实时加权排序、TOPSIS、帕累托与敏感性分析视图。

无人机监控平台 · React, WebSocket, InfluxDB, Docker — 独立开发实时遥测演示版，并参与开发另一套生产平台：数据接入、WebSocket 推送、时序存储、飞行分析与看板。

金融量化分析模型 · Python, scikit-learn — 基于 API 的行情获取、技术指标计算、策略回测，以及随机森林均线交叉预测。

Connoisseur 全球采购流程 MVP · Next.js, TypeScript — 从需求到报价的采购平台，含客户案例、报价、支付状态与后台管理。

MoTai AI 写作工具 · Electron, LLM API — 本地优先的桌面应用，支持上下文感知生成、人工审阅、备份与多格式导出。

教育背景

计算机科学硕士（交互媒体）· 爱尔兰科克大学（UCC） 2024.09 – 2026.03
二等一荣誉（2:1），前 10% · 主修：Web 开发、前端开发、VR 开发

应用数学学士（数据计算及应用）· 太原科技大学 2020.09 – 2024.06
专业前 10% · 主修：数据分析、机器学习、人工智能、算法设计与分析

专业技能

数据与 BI	SQL、MySQL、Python、Excel、Power BI、Tableau、数据清洗、KPI 分析
电商运营	Amazon Seller Central、Helium 10、Keepa、Amalytix、竞品与市场分析
工程开发	JavaScript/TypeScript、React、InfluxDB、REST API、Git、AI 工作流自动化
语言	英语（雅思 6.5），中文（母语）
